

The main theme of this book concerns the relationship, if any, between and addiction. Are they linked biochemically? Is there a schizophrenia common factor for all addictions? We need to know whether the chemistry of addiction can help clarify the biochemistry of schizophrenia and vice versa. There is much anecdotal evidence that many sufferers from schizophrenia are addicted to smoking, are adversely affected by even small amounts of alcohol and do have their schizophrenic illness worsened by street drugs. We would urge our readers to try to find correlations between some of the findings described here on the biology of schizophrenia and what they read in the up-to-date chapters on addictions. We would like to thank all the authors for the excellence of their work and for their cooperation and understanding of our needs and also, for the second time this year, to thank MTP Press for their willingness to publish a perhaps somewhat provocative book. We thank them for their humanity.

Political Education: National Policy Comes of Age, Lightsabers, Batmobiles, and Kryptonite: The Science of Superheroes, Quick and Healthy: Herbs (Australian Womens Weekly Home Library), Fodors Exploring Australia, 4th Edition (Exploring Guides), The Golden Fleece: Manipulation and Independence in Humanitarian Action, A History of Civilization, How to polish gems: And three years later at Boston the first part (Japanese Edition), Adolescence and Emerging Adulthood, a Cultural Approach, Daughters of the Moon: The Final Eclipse - #13 (Daughters of the Moon),
