

NOTE: THIS IS AN UPDATED VERSION ?In Dangerous Luck, David Makow brings into focus the question as to whether a persons life unfolds by his own volition, circumstances, or fate. A teenager when the Nazi war machine rolled into his native Poland, he survived on his wits and his ability to make quick decisions that turned out to be correct. In 1942, when the Holocaust began, he made the most amazing choice. Instead of trying to get as far as he could from the Third Reich, he went to hide in Germany itself, passing himself off as a Catholic Pole, in a foreign workersâ€™ camp. Suspected of being Jewish and sometime blackmailed, he was protected by a Catholic Pole called Wladek, who set the others right about Jews. After the war, as David was heading east back to Poland, he was robbed by a Soviet patrol. This incident made him change his mind and go West instead. Luck too brought him to Switzerland and the chance to catch up on his lost education and have a successful career as a research scientist in Canada.
